Springer-Verlag New York Inc., United States, 2013. Paperback. Book Condition: New. 235 x 155 mm. Language: English . Brand New Book ***** Print on Demand *****.The present book is the offspring of my Habilitation, which is the key to academic tenure in Austria. Legal requirements demand that a Habilitation be published and so only seeing it in print marks the real end of this biographical landmark project. From a scientific perspective I may hope to finally reach a broader audience with this book for a critical appraisal of the research done. Aside from objectives the book is a reflection of many years of research preceding Habilitation proper in the field of efficiency measurement. Regarding the subject matter the main intention was to fill an important remaining gap in the efficiency analysis literature. Hitherto no technique was available to estimate output-specific efficiencies in a statistically convincing way. This book closes this gap, although some desirable improvements and generalizations of the proposed estimation technique may yet be required, before it will eventually establish as standard tool for efficiency analysis. The likely audience for this book includes professional researchers, who want to enrich their tool set for applied efficiency analysis, as well as students of economics, management science or operations research, intending to learn more about the potentials of rigorously understood efficiency analysis. But also managers or public officials potentially ordering efficiency studies should benefit from the book by learning about the extended capabilities of efficiency analysis. Just reading the introduction may change their perception of value for money when it comes to comparative performance measurement. Softcover reprint of the original 1st ed. 2002.
